MISSION

Working world-wide to provide opportunities for children and youth to explore identity through art and self-portrait photography

HUMANITIES EXPERTISE

Based on the belief that everyone has the right to meaningful creative experiences, workshops held in schools, orphanages, community centers, special care facilities, and non-governmental organizations encourage each participant to gain an understanding of their individual value, potential, and beauty as a unique person. The I AM: Projects have worked with special needs children in Cambodia, victims of human trafficking in Thailand, orphans in Romania, genocide survivors in Rwanda and Bosnia, impoverished children in India and Ethiopia, and other under-recognized groups around the world.
